

TREE Fund
Tree and Soil Research Fund
for Landscape Architecture

Tree Research and Education Endowment Fund (TREE Fund), a national nonprofit corporation dedicated to empowering urban tree research, established the **Tree and Soil Research Fund for Landscape Architecture (TSRF)** in 2017, specifically intended to support research questions directly related to the design, installation and management of trees in urban landscapes to support the work of Landscape Architects. TREE Fund has established an initial endowment goal to raise \$500,000 by January 2020 and to begin awarding research grants of \$25,000 per year, in perpetuity, once this endowment level is secured.

Landscape Architects and colleagues who value the benefits of healthy, mature trees in our cities are encouraged to support this endowment campaign.

Thank you for your support.

James Urban, FASLA
TREE Fund Trustee

TSRF is a permanently restricted endowment fund supporting areas of research of interest to the landscape architecture community with special focus in the area of trees and soils.

Supported research will include:

- the design and specification of trees and soils in urban landscapes
- propagation and nursery practices that impact the establishment and long term growth of trees
- improving species diversity
- tree root and canopy structure improvement
- soil and drainage design and modification
- tree planting practices
- tree planting space design
- tree establishment and maintenance practices
- planting soil management and maintenance.
